

Infant/Toddler Class

We have a large infant classroom which provides enough room for movement, learning through play, sleeping, eating and diapering. We ensure that every baby has room to roll, crawl, pull up, and cruise a space that is safe and inviting. Our teacher to infant ratio never exceeds 4 to 1. Our teacher turnover is little to none.

From rocking and thoughtful interaction, to naptime, singing or a reading of “Goodnight Moon,” teachers provide just what your baby needs, all in a safe, clean and healthy environment.

Whether your child is six weeks or six months old, we’ll support his/her development and take care of their daily needs the same way you do. We’ll constantly communicate with you about all of the important parts of his/her day such as diapering, feeding, and sleeping - not to mention letting you know about the exciting new learning he/she experiences every day. We’ll stimulate your baby’s cognitive, emotional and physical development by:

- Singing
- Talking
- Holding
- Reading
- Playing

This interaction between caregiver and the baby helps them develop gross and fine motor skills, thinking skills, language and emotional development. Every day offers a chance for your baby to explore and learn in a safe, fun, and developmentally appropriate environment while under the close supervision of our highly trained teachers.
